

4's class description

At Building Blocks Preschool, we provide a rich and engaging classroom environment with educational materials to inspire creativity and curiosity, in order to build a strong foundation for future academic success. Our 4's teachers have thoughtfully planned out themes for each month that are a blend of hands-on arts and crafts, songs, and poems. We offer small class sizes that help your child gain confidence in their social-emotional growth with classmates.

Students focus on learning to identify upper and lower case letters and their sounds, how to write and spell their first name and are introduced to pre-primer sight words. They are also taught proper pencil grip, recognizing shapes, holding scissors correctly and gaining the fine motor ability to cut and trace along lines. There is also a strong emphasis on number recognition (0-20), how to skip count to 100 by 1's, 5's and 10's. Building Blocks strives for a well-rounded learning experience for our students.
